

Go2Sleep Home Sleep Testing

Heart rate/ OSAS monitoring/ sleep stages /sleep data sharing

SLEEPON

Better sleep, better life

Unparalleled Precision and Comfort

The proprietary and SleepFit™ algorithm is applied for unique functions like screening sleep apnea, sleep stages and sleep efficiency.

The abundant capillaries on your fingers helps Go2Sleep to provide significantly more accurate detection data compared to conventional wrist band devices, plus the ultra-compact size makes it barely noticeable, ultimate sleeping comfort guaranteed.

Compact & Sleek

Food grade silicone construction for 100% safety, weighs only 6 grams (0.21 oz.), you will not notice it on your finger.

SNORING

What is it and why would I snore?

Snoring is a common condition which occurs when the flow of air through the mouth and nose is physically obstructed, when it gets serious, it is called Obstructive Sleep Apnea Syndrome (OSAS).

OSAS – The Not So Silent Killer. When a patient stops breathing, the oxygen level drops, sometimes to very dangerous levels.

With OSAS remains untreated, people are at increased risk of other health problems, such as high blood pressure, diabetes, obesity as well as cardiovascular diseases, and it increases the chance of having depression and even dementia.

How many times you stop your breathing?

GO2SLEEP

Go2Sleep offers professional AHI monitoring and detection, real time analyses of your sleep quality and accurate detection of AHI. A new generation of AI device to track sleep, screen sleep apnea and improve sleep health.

Fully Automatic for Ultimate User Experience

Super easy to use, just wear it on any finger, and you are good to go. Your comprehensive sleep report will be ready when you wake up the next morning.

A Comprehensive Sleep Report Just for You

Our App keeps track of your sleep quality every night, which covers all essential sleep and health data, including your sleep stages, heart rate, AHI, body movements, sleep debt, and more importantly, health tips tailored for you.

You can find our App on App Store and Google Play

OSAS Alert

Whenever apnea is detected during your sleep the vibration will alert you to increase the chance of you unconsciously changing your sleeping position, diminishing the probability of sleep apnea.

The APP support: iOS 9.0 And above
Android 4.2 And above

You and Your Loved Ones All in the App

Synchronize your Go2Sleep device with the App via Bluetooth, search your family member by their ID and set them as family so you can track all the key data of yourself and your loved ones, wherever they are.

Sleep report output

GO2SLEEP continuously record data, APP can display data per minute, display four dimensions minute data(heart rate, blood oxygen, sleep stages, toss and turn.The result can be exported to a pdf file which you can share or print anytime . GO2SLEEP also give you the health advise based on you report.

What You Get in the Package

Go2Sleep Home Sleep Testing ×1

• Net weight: 6g/0.21 oz.

USB cable ×1

• Magnetic Charging

Charger ×1

• IPX67 Waterproof Rating

User Instructions & Warranty ×1

• Food Grade Silicone

Silicone Ring Holder ×3

• Stores sleep data up to 7 nights

SPECIFICATION

The bluetooth version: Bluetooth 4.1

Operating voltage: 4.2V

Product name: Go2Sleep Home Sleep Test

Working temperature: -10°C~50°C

FCC ID: 2APMM-121-01

The APP support: iOS 9.0 And above
Android 4.2 And above

TELEC ID: SZAWW180615001-01

SLEEPON

SLEEPON is a brand to improve sleep quality in everyday life.

The company, founded by electronic and data processing experts from Silicon Valley, is committed to the use of new technologies and new ways to improve users' sleep health and improve their living standards.

University of Edinburgh medical expert serves as the principal researcher.

The product won the 2017 prize of the IDG technology conference.

Strategic cooperation with the Northumbria University in UK.

10 international patents.

Certified High and new technology enterprises
